

Series 1600

Series 1600

Engineered Performance, Single Pane. Features our proprietary "Motion Slider Track" – providing smooth operation and the kind of longevity not found in other windows. The Series 1600 sets the standard for a top-of-the-line single pane window.

Clamp ring installations are made relatively easy by our one-piece outer window frame and interior trim ring. Quality components consisting of a "Dual-Fin Weather Seal" and our "Motion Slider Track" result in windows that slide easily and seal tight.
